### Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

An electrosurgical instrument (100) having a movement sensing device (124) for controlling the electrosurgical output. The electrosurgical instrument (100) includes an elongated housing (102), an electrically conductive element (106) supported within the housing and extending distally from the housing, the electrically conductive element (106) connectable to a source of electrosurgical energy, and a sensor (124) disposed within the housing (102) and in electrical connection with the source. The sensor (124) detects movement of the conductive element (106) and energy source supplies energy in response to the signal from the sensor.
